

Market Participants Group Statement of Intent

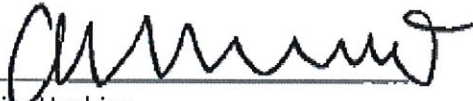

The members of the Market Participants Group (MPG) welcome and strongly support the publication of the FX Global Code. We welcome this initiative to strengthen the integrity of the FX market and have been actively engaged in the development of the Global Code as members of the MPG. As participants of the wholesale FX market, we intend to adhere to the Global Code by evolving our own institutions' FX practices to be consistent with the principles in the Global Code. We are also committed to promoting the Global Code to our counterparties and customers, in support of the integrity and effectiveness of the FX market.
